# Maxwell K. Li

239-370-5545 | maxkli2007@gmail.com | linkedin.com/in/maxwell-kaiyang-li | github.com/Flapjackpants | maxwellli.dev

## Education

**Cornell University** Ithaca, NY
*Bachelor of Science in Computer Science + Operations Research & Information Engineering* *May. 2028*

## Awards

**Gold Division, U.S.A. Computing Olympiad** | *C++* Jan 2025
- Demonstrated strong proficiency data structures and algorithms in C++ under strict time constraints, optimizing runtime and memory usage for large datasets. Gained strong knowledge in object-oriented programming.

## Experience

**Cornell FinTech Club** | *Financial Software Engineer* Sep. 2026 – Present
- **Millennium Management:** Developing a financial AI agent, designing ETL pipelines to ingest and process market/financial data and building an LLM-driven system to generate actionable trading and research insights using Python, RAG, and prompt engineering. Presenting our project at Millennium HQ in May.

**Hack4Impact Cornell** | *Software Developer* Nov. 2025 – Present
- **MedExplain:** Rebuilt the frontend of this global medical-information platform with React and TypeScript, developing responsive, accessible interfaces for **2,000+** active monthly users. Collaborated in Agile design sprints, Git pull-request code reviews, and Figma-to-code handoffs on a cross-functional team.
- **HVTP:** Built inventory management, multi-field sorting, and sales-history views for the Hudson Valley Textile Project, a fiber supply-chain platform connecting **250+** local wool farmers. Developed data visualization dashboards and CSV export tooling backed by REST API endpoints in a full-stack web application.
- **Mavuno:** Architecting a cross-platform mobile application from the ground up, defining the technical stack, app structure, and core feature set. Leading UI/UX implementation and backend integration to bring an MVP to the client, with the goal of providing agricultural education resources to **7,700+** households in the Congo.
- **Anabel's Grocery:** Maintain and extend the backend database powering a nonprofit grocery store serving Cornell's **20,000+** student community and combating campus food insecurity, ensuring reliable data integrity through schema migrations, SQL queries, and API endpoints supporting continuous feature development.

## Projects

**Marko** | *Swift, SwiftUI, ARKit, Python, PyTorch, React, three.js, ElevenAPI* Oct. 2026
- Won **2nd place** at BigRed//Hacks 2026 with an iOS app that builds AR indoor maps from one phone scan.
- Built a LiDAR localization pipeline (SuperPoint, LightGlue, NetVLAD) on RunPod GPUs within **1 cm** accuracy.
- Implemented Dijkstra routing with AR paths and voice guidance, plus a React/three.js venue analytics portal.

**MajorScout** | *Python, Flask, React, SQLAlchemy, pandas, Stripe, OpenAI* July 2026
- Built a full-stack college-major matching platform ranking **2,000+** programs across **25** universities and growing.
- Scaled to **2,300+** users in the first month with influencer marketing, generating **$321** in revenue overall.
- Implemented Google OAuth, Stripe subscriptions, SQLAlchemy persistence, and OpenAI-powered essay guidance.

**Burger.AI** | *Python, React, OpenAI API, Anthropic API, Shell* Feb. 2026
- **Finalist** at the 2026 Cornell AI NYC Hackathon for an automated pipeline to test agentic financial AI systems.
- Used pre-tool and post-tool hooks to validate JSON payloads and redact PII, bridging the "Intent-Action Gap."
- Improved model pass rates of 36% (Sonnet 4.6) and 59% (GPT-4o-mini) to **98%** based on OWASP standards.

## Technical Skills

**Languages**: Java, Python, C, C++, TypeScript, HTML/CSS, OCaml, Lua, Swift
**Frameworks**: React, Flask, FastAPI, Node.js, PySide6, JUnit, OUnit, SwiftUI, three.js, PyTorch
**Developer Tools**: Git, Docker, Google Cloud Platform, Oracle Cloud Infrastructure, Railway, FFmpeg
**Libraries/APIs**: pandas, NumPy, Matplotlib, scikit-learn, Vaex, Shapely, OpenAI API, Anthropic API, Whisper
**Skills**: Cloud Computing, Distributed Systems, Machine Learning Principles, Probability and Statustics, Data Analysis
**Courses**: Honors Data Structures and Algorithms, Functional Programming, Intro to Machine Learning, Computer System Organization, Linear Algebra, Probability and Statistics, Data Science and Decision Making
